

InterCall Mobile Assistant

iPhone Call Control User Guide

www.intercalleeurope.com

If you are a frequent traveller or often join meetings while out of the office, InterCall's Mobile Assistant is an easy-to-use solution that will keep you connected. Mobile Assistant, a free* service from InterCall, gives you one-touch dialling into your conferences from your mobile phone.

The iPhone version of the application joins you to your meeting by dialling out to your phone from the conference in much the same manner that web conferences initiate connections. You have the option to join a conference as a participant or start the conference as the leader. As a leader, you also have conference controls available to you directly on your iPhone.

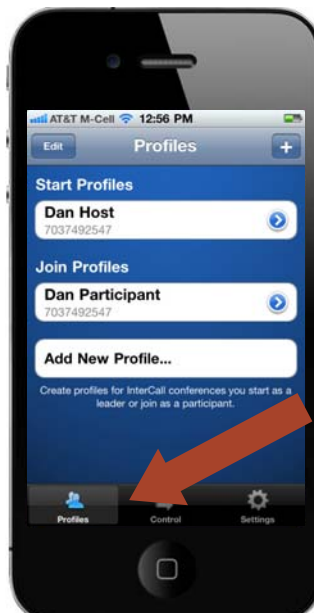

Getting Started with iPhone Call Controls

You can easily manage your audio participants on-screen when using Mobile Assistant on your iPhone.

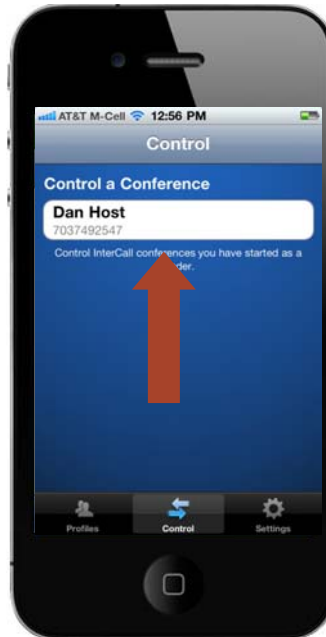

- 1 After your meeting is launched, tap the Home button.
- 2 Relaunch the Mobile Assistant application.

- 3 Tap **Control**.

4 Tap the active Start Profile.

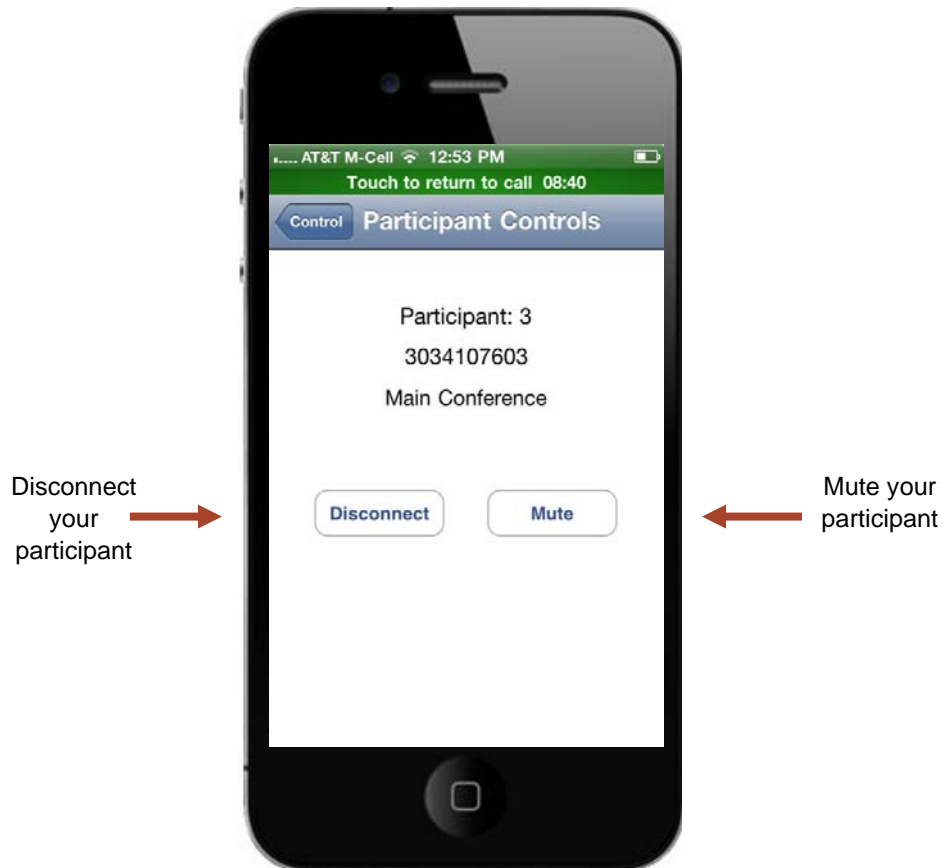

Using Your iPhone Call Controls

Control your conference using our friendly meeting interface.

Managing Individual Participants

Manage each participant by tapping on their connection.
